## 1. INTRODUCTION

It is our pleasure to present the data from the Designation of Origin CATALUNYA Annual Report for financial year 2023.

The total volume of qualified wine was 354,990 hL, which represents a decrease of -10.2% with respect to the total volume that qualified in 2022. By colours, there was a drop in all three. Percentage-wise, the drop was rather sharp in rosé wine (-42.6%), rather significant in red wine (-13%), and more limited in white wine (-2.2%). The latter was the most qualified for the ninth consecutive year, now accounting for more than half (54.5%). It was followed by red wine at 39.7%, and finally, rosé wine at 5.8%.

Out of all the qualified wine, 225,405 hL were from the 2022 harvest (63.5%) whereas the rest corresponds to prior vintages.

As for the stock of qualified wine by the end of the season (31st July), it was lower than the 2022 value by 25.2% for an absolute value of 210,231 hL. It was also higher at the end of the year (31st December) than in 2022, but not as much (192,789 hL; 9.9%).

As concerns bottled wine, a volume equivalent to 41,243,100  $\frac{3}{4}$  litre bottles was marketed in 2023 with 20.4 million (49.5%) marketed on the Spanish national market and the remaining 20.8 million (50.5%) marketed abroad. A comparison of these figures with the 2022 figures reflects a slight drop in national consumption (-1.8%) and a sharper recession in foreign markets (-9.9%). The overall commercialisation figure dropped by 6.1%, which equals 2.7 million bottles less than the year before.

The European Union remained the main foreign market block despite a 15.3% drop in sales for a total of 7.3 million bottles. Non-EU European countries came in second at 5.6 million bottles, particularly thanks to the United Kingdom which continued to be the main destination for DO CATALUNYA wines as it imported more than 4 million bottles.

In the EU market, the Member States which purchased the most wine came in the following order: Latvia (1.6 M bottles, 1.3%), Sweden (1.2 M bottles, -12.7%), Denmark (1.1 M bottles, -13.9%), Germany (0.9 M bottles, -12.5%), and the Netherlands (0.6 M bottles, -8.4%).

Outside the EU yet still on the European continent and far from the United Kingdom values, Switzerland (0.49 M bottles, 27.3%), Russia (0.41 M bottles, -43.1%) and Norway (0.36 M bottles, -29.0%) are all worth mentioning.

On the other side of the Atlantic on the American continent, Canada was once again the leader (0.61 M bottles, +16.6%), followed by Mexico (0.58 M bottles, -24.8%), Cuba (0.33 M bottles, +5.3%) and the USA (0.32 M bottles, +31.1%).

In the Asian division, Japan was the leading country once again this year at 0.62 M bottles (-20.1%) and China regained its market share (0.22 M bot, +39.3%).

DO CATALUNYA wines continue to be present around the world in line with the vocation for export that has always characterised this designation of origin.

Once again, thank you very much to all the Catalan wine growers and wineries for their effort and dedication to promoting this DO which I preside over with such enthusiasm and pride.
